

ASSORTMENT:

Poylpropylene twine for harvesting
Polypropylene twine for packaging
Polypropylene rope
Polypropylene raffia
Polypropylene fibers
Polypropylene bags
Polypropylene strapping bands

POLYPROPYLENE TWINE FOR HARVESTING

We have wide assortment to offer, starting form the type 95 m/kg until 1000 m/kg. Regarding the thickness and strength, our assortment is adapted to all types of baler machines.

POLYPROPYLENE TWINE FOR PACKAGING

We have wide range of twine to offer, startin from the type 300 m/kg, utnil 1500 m/kg. Main use is in food industry, and it not negligibile either in agricultural production, especially in crops in greenhouses, where we recomend twine with UV protection. Twine possess a health certificate.

POLYPROPYLENE ROPE

Polypropylene rope are widely used in the food industry as well in companies engaged in decorative packaging. Ropes are made from two to four lanes type of 300-1000 m / kg. Polypropylene rope possess a health certificate.

POLYPROPYLENE RAFFIA

Polypropylene raffia is widely used in agricultural production, especially in wine growing, olive production and field crops whose woody binds like peppers and tomatoes. It may be packed in a cut staple in bales or wound spool as of 1 and 2 kg in a variety of colors and types from 700-1500 m / kg.

POLYPROPYLENE FIBERS

Polypropylene T and F fibers of various lengths and colors enhance the mechanical properties of reinforced concrete and mortar, eliminate shrinkage cracks in the concrete, and increase resistance to freezing and the influence of salt, and as well - fire resistance.

POLYPROPYLENE BAGS

Polypropylene bags are made from circular fabric suitable for packing seed, grain, flour, feed, etc. There is a possibility of manufacture in different designs and sizes from 45x80 up to 55 x 110. Polypropylene bags possess a health certificate.

POLYPROPYLENE STRAPPING BAND

The production program includes strips of different colors and sizes. PP strapping bands are flexible for use with semi or fully automatic machines for packaging and packaging hand tools (metal connectors).

They are suitable for all types of friction and heat bonding in all types of machines that can be encountered in the market.

Surface relief structure of the strapping band guarantees a good effect of bonding, whether if it's done by friction, heat bonding or by standard tools for connecting with metal clips.

With our polypropylene strapping band your products are safe during the transport, in optimal conditions, to its final destination.

Application scope of polypropylene strapping band is widespread in almost all aspects of the industry. Depending on the size, it finds its application in the packaging, pharmaceutical, construction industry, etc.
